

# Digital Photography

## “Out of the Box and Into Your Hands... Now What?”

Everyone said you *had* to purchase a digital camera, film cameras weren't "cool," so you did. Now what? At least with film cameras you knew what to expect, now what's with this camera? Image size? Formatting? How come the batteries don't last? How do I get my prints? Print at home? Print on-line? Print in the store? What's this all about and who can help me?

*Noble's will help you find your way!*

Brian Noble will lead you through an introduction to digital cameras, the basics of digital photography and how to get the most out of your new camera. Even if you didn't purchase your new camera at Noble's, you're welcome here!

## An Introduction Class for the Digital Beginner A Two Class Series: **November 4th & 11th** **Wednesday Evenings**

**Class One:** How to Get The Most Out of Your Digital Camera. Including flash settings, self-timer, continuous frame, macro, landscape mode, memory cards and format issues, exposure, lighting, and the movie mode. It may be a digital camera but the basics of good picture taking are still the same.

**Class Two:** How to connect your camera to your home computer or how to avoid having to connect your camera to your home computer. How to make prints. What do the different image qualities mean and when do you use them. Don't be afraid to ask questions or ask to review areas you still don't understand.

**Registration:** Wednesday evenings, November 4th & 11th
